# COMPUTERS IN INDIA

Since the advent of computer technology, India has always seen a low penetration of computer technology. High costs have further exacerbated this scenario.

Well into the 21st century, little has changed.

Source: [statista.com](https://www.statista.com)

The image of a bulky **desktop** or a **laptop** comes to our mind when we think of computers. In India both these options tend to be **expensive**, usually costing more than 25,000 Rupees and prove to be **high maintenance** and **cluttered**.

**THE IDEA OF A COMPUTER**

MINI PC | THIN CLIENT

Alternatives to standard desktops and laptops

# THINVENT TECHNOLOGIES

Since 2007, we have been manufacturing indigenous Mini PCs, Thin Clients, that are-

**LOW COST**

The image shows a close-up of Indian Rupee coins and banknotes, symbolizing cost-effectiveness.

**LOW POWER CONSUMPTION**

The image features a glowing globe with lightning bolts, representing energy efficiency and low power usage.

**ENVIRONMENT FRIENDLY**

The image shows green leaves, symbolizing environmental friendliness and sustainability.

**EASY TO REPAIR**

The image displays a green printed circuit board (PCB) with various electronic components, indicating ease of repair.

**LOW MAINTAINANCE**

The image shows several wrenches and a hammer on a wooden surface, representing low maintenance requirements.

**SPACE SAVING**

The image shows a person's hands holding a small, compact device, illustrating space-saving capabilities.

**NOISELESS**

The image shows a woman with her finger to her lips in a 'shh' gesture, symbolizing silence or noiselessness.

# WE MAKE RUGGED COMPUTERS...

..that are long lasting, reliable and hassle free. Thinvent devices withstand dust, heat and erratic power supply of rural India and Africa.

# MICRO 6 MINI PC

*Our customers live half their lives online. They need to always be connected. So we built a computer that is small, lightweight and energy efficient like a smartphone. It has the processing power of a high end smartphone, with 4K graphics and flawless audio. But it costs less than the cheapest smartphones in the market.*

*The Micro 6 is all this and more. It comes preloaded with our Thinix operating system, which gives you all the software you will ever need, without any pesky pop-ups, ads or online tracking.*

- **Processor** ARM Cortex A55 Quad Core 1.91 GHz
- **Memory** 4 GB RAM
- **Storage** 32 GB eMMC. Expandable through microSD card.

# CUSTOMER STORY |

Ocrolus is a leading document automation platform that works across finance and banking segments, that ultimately enables companies to focus on their core business. Thinvent is proud to support Ocrolus in their quest of automation. Our devices have allowed the company to significantly reduce their IT infrastructure costs. Earlier they relied on costly computers produced by major tech giants. Moreover, Ocrolus also receives dedicated customer support from our expert technicians all year around.

# CUSTOMER STORY |

Thinvent is proud to be associated with the 4th largest rail network in the world and India's largest employer, the mighty Indian Railways! Since 2007, Thinvent is IR's preferred IT vendor.

Some of the successfully executed Indian Railways projects include, Unreserved Ticketing System (UTS), Passenger Reservation System (PRS), Automatic Ticket Vending Machines (ATVM), Crew Management System (CMS), Parcel Management System (PMS) among others.
