

Why Thin Client?

- Cost effective
- Space saving
- Noiseless
- Low power consumption

Smaller sized components keep the costs lower without hurting the performance.

Its overall small size saves a lot of space leading to less cluttered desks/workstations.

It requires no cooling system which eliminates the need for a noisy fan.

Thin Clients are made with components that consume less energy.

About Us!

Founded in 2007, Thinvent is known for making rugged computers that are low cost and reliable. We serve industries such as manufacturing, banking, transport and education.

Thinvent Thin Client

Know more about some of our hottest selling Thin Clients such as the *Micro 5* and *Neo R*.

Micro 5
